

Information for friends and supporters of Ghatronic

Topic: Train our Trainers

14th April 2021

A big thank you to Rolf Duerrschabel, the Senior Trainer of the WAVA in Accra!

To improve the educational and technical knowledge of the Ghatronic-Foundation-Trainers we got the chance to register Evans and Abraham for different seminars at the WAVA (West African Vehicle ACADEMY, a joint venture between Rana Motors Ltd., Robert Bosch Ghana, and GIZ (Deutsche Gesellschaft für Internationale Zusammenarbeit), the major implementing organisation of technical development cooperation, under GIZ's develoPPP.de programme.

For the following courses, each of them 5 days seminars, our trainers are registered:

EL-1: Basic Electrics

EL-2: Advanced Electrics

EM-1: Engine Management Systems: Function, diagnose and troubleshooting

BS-1: Hydraulic Brake Systems: Function, diagnose, troubleshooting and service

BS-2: Vehicle Dynamics (ABS, ASR, ESP, SBC); Function, diagnose and troubleshooting

As we are classified as an educational entity, the sponsor for us is GIZ. The costs incurred will be borne by GIZ. We are confident that these seminars will help us to develop professionally prepared seminars. We hardly can wait to open the Ghatronic Digi mechanics school for the first courses.

In respect of the pandemic situation, we hope to be able to open the Digi-Mechanics-School at the end of 2021, or latest at the beginning 2022. As soon as we know the exact dates, we will update the News-Section of the website and inform the participants who were registered for the courses we had to cancel in March 2020.
